

Dr Deepak Chopra

Acknowledged as one of the world's greatest leaders in the field of mind body medicine, Deepak Chopra M.D. continues to transform our understanding of the meaning of health.

Through his creation of The Chopra Center for Well Being in California in 1995, Chopra established a formal vehicle for the expansion of his healing approach using the integration of the best of western medicine with natural healing traditions. Dr. Chopra serves as the Director of Education at The Chopra Center, which offers training programs in mind body medicine (Journey into Healing). The University of California, San Diego School of Medicine has granted continuing medical education credits for this program, which satisfies requirements for the American Medical Association Physician's Recognition Award. Through his partnership with David Simon M.D. and numerous health care professionals in both conventional and complementary healing arts, Chopra's work is changing the way the world-views physical, mental, emotional, spiritual and social wellness.

Potential

What prompted Deepak Chopra to expand his view of conventional medicine to embrace complementary treatments from around the world?

Formerly the Chief of Staff at Boston Regional Medical Center, Dr. Chopra built a successful endocrinology practice in Boston in the 1980's. Chopra realised in his medical practice that there was potential in western medicine for the establishment of a new life-giving paradigm, one which encompassed the fundamental principle that perfect health is more than just the absence of disease. He began to envision a medical system based upon the premise that health is a lively state of balance and integration of body, mind and spirit.

Published works

Chopra is known worldwide for his published works. The author of more than 35 books and more than 100 audio, video and CD-ROM titles, he has been published on every continent, and in dozens of languages. His newest book, *Grow Younger, Live Longer: - 10 Steps to Reverse Ageing* is out now. Deepak Chopra's popularity as an international presenter and keynote speaker is exemplified in an impressive list of honorariums. Chopra has been a keynote speaker at several academic institutions including Harvard Divinity School, Harvard Business School, and Kellogg School of Management. He is the recipient of the Einstein Award through Albert Einstein College of Medicine in collaboration with the American Journal of Psychotherapy.

A LETTER FROM LIZ MALOY

This last year has been an amazing one in my role as a Bi-Aura practitioner and one in which I have learnt a great deal. I have been predominantly practising from home, giving home/workplace visits where appropriate, some remote sessions and some animal treatments too. Although the last year has brought clients with all manner of challenges and ailments, I have been particularly drawn toward the treatment of people suffering from stress, loss, emotional challenges of all ilks, working with children and also women with fertility issues. No day is ever the same and in fact each client is such a gift I feel such gratitude to have been called upon to do this work. I never fail to learn something new and my clients really are the source of such inspiration!

Having just returned from a visit to New Zealand where I met some incredible souls and introduced the idea of Bi-Aura to many, I have been invited to return in the future to give clinics at various places including a Naturopathy college and various complementary health practices. The word is definitely going global! As we all know, change is the only certainty so with that it mind and without saying too much at this stage, on the horizon, there is the prospect of practising from a well established London clinic and I hope to move into the corporate world in the future thus meeting my need for variety. On a personal level, my life has never been better, another factor which I attribute to the overall balance that practising and receiving this wonderful therapy brings. I have some fabulous friends, family and colleagues within the Bi-Aura circle and beyond, people with such gifts I feel privileged to know you. Have faith and the universe provides! Love and joy to you all – Liz Maloy XXX

CASE STUDIES REQUEST

Emma Jenkins writes:

Dear members, Maire has asked me to compile some case studies for the web site. Although I have managed to collate some great examples from the student studies, it would look even better to have practitioner's input. We are looking specifically for clients who have experienced near or total remission from e.g. arthritis ME, MS etc, we also require a testimonial letter that corroborates exactly with the practitioner's report. It does not have to be in great depth but it should contain details of:

1. Client background
 2. Ailment and it's effect
 3. Number of sessions attended
 4. Summary of session progress
- I don't need original records, e-mail me with details if you can. I do hope you can help with this.

Love and Light

London success

Feel Good Show

Saturday 01 May, 2004
by Dan Kahn writes

The Bi-Aura stand at the Feel Good Show definitely left a few of its visitors feeling good after visiting it. Bi-Aura therapists were on hand all through the exhibition explaining what Bi-Aura is and giving "taster" sessions to the curious.

The highlight of the Bi-Aura experience was the great response from the exhibition visitors to our lectures on the Sunday and Monday (2nd & 3rd May 2004) about

Bi-Aura makes it's mark in Canada...

Sunday 18 April, 2004
by Violetta Grzesko

BODY, MIND AND SPIRIT EXHIBITION, "What a great success it was!"

We were the busiest stand at the exhibition and Michael D'Alton's one hour seminar was an absolute winner. We were going strong all day with sample sessions and by the end we gathered about 26 people who want to start training themselves.

We are setting up a course in Winnipeg, Manitoba in March of 2005. People were so excited to hear that Bi-Aura Therapy training is coming to Canada and the excitement hasn't stopped since. We are getting calls from people wanting more information and who are interested in having sessions to experience the

working with the Chakra system through Bi-Aura and demonstrating the PIP scanner. The lectures were given by Dan Kahn, with assistance from Liz Maloy, Caroline Heward, Jacqueline Zaki, and Dr Thornton Streeter from the Centre for Human Energy Field Research (CHEFR).

The Bi-Aura Foundation had over 150 people attending each one. The lectures were so in demand that we were unable to fit everyone into the lecture room allocated and had to go into a conference hall !

On Monday's lecture, we had an excellent live demonstration of the PIP scanner in action. Dan Kahn demonstrated the Bi-Aura therapy on

therapy on themselves.

The radio interview was amazing as well. Michael explained Bi-Aura Therapy to the audience and challenged the population of Winnipeg to try a session before they dismiss it. The radio hostesses asked us if it would be possible to do a follow up on this story and we agreed.

Over all, Michael's first visit to Canada was a great experience. He was greeted warmly by everyone he met and they were ready to support him in everything he did.

Michael said he felt so much love and acceptance for the therapy here that he will definitely come again to do an exhibition and workshop before we start the training.

Many thanks to Violetta Grzesko and her Canadian Team.

Jacqueline Zaki, and picked up, among other things, a blockage at the throat chakra. At the end of the session, the team from CHEFR showed the audience pictures with the PIP scanner of the block present at the beginning of the session and how it had been cleared by the end.

"Seeing is believing" and through the marriage of modern technology and ancient knowledge it left the audience extremely impressed.
